To jump-start your journey in a new program, start with Figure 3-3. **Figure 3-3: Taking a tour of the interface. Deciding Whether to Use Photoshop** If you're looking at the online, offline, or print advertising publication, you can select an appropriate program to use for print production. Because of the numerous features of Photoshop, it can produce output for many different types of printing. It's best to work on an image in Photoshop, saving it to your hard drive, and then using Photoshop Elements to make changes that can then be put into Word for further editing or for mailing. Whether you use Photoshop for print or the Web depends on your current status as a professional photographer or your vision of your photography future. If you're a seasoned professional or if you're planning a move to the Web, you need Photoshop. But if you're just starting out as a photographer, you can make the transition to the Web with the use of online programs like Elements and Picasa (covered in the next section) and image software that you can use at home on your personal computer, such as Microsoft Photo Story, Apple iPhoto, or Photoshop Elements (covered in the preceding section). You need to work at a comfortable pace for making use of the features that make Photoshop so useful. If you don't like using a mouse, use the keyboard for navigation and keyboard commands. It is very easy to become overwhelmed with Photoshop options and features. Keep a journal or a notebook to keep track of your specific projects so that you can see the

I know that in Hilbert space if we have a self map on a Hilbert space, the so-called spectrum is invariant, so it is basically some circles in the complex plane. What I want to know is that, for Hilbert  $C^*$ -modules, could the spectrum have circularity? for example, could the map of a self map in Hilbert  $C^*$
